

Pleated Flat Track

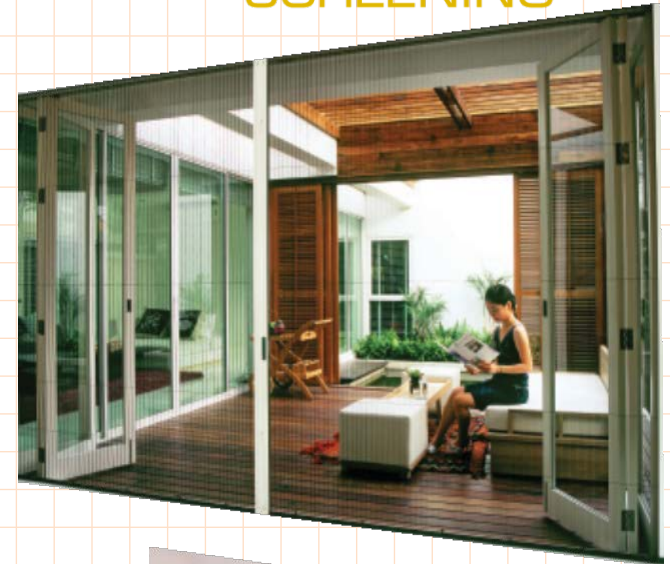

With this system there are no channels or roller tracks to trip over. The **3mm high flat track** guide allows safe entry and exit from the room

Available in a range of popular finishes in your choice of double or single door configuration.

The screen system is compatible with most door types and is supplied and fitted by our professional installers.

Sashes are held closed by magnetic catches and can be latched from the inside if desired.

Japanese Pleated
Screening Systems

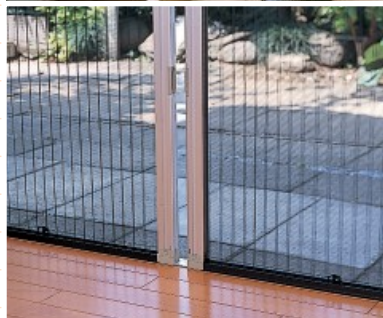

Innovative Concept of Living

Pleated Flat Track is a unique insect screen ideally suited for use with:

- *Bi - fold doors*
- *Sliding doors*
- *French and balcony doors*
- *Multi-Panel stacking doors*
- *Out-door rooms*
- *Alfresco dining areas*

The screen system is operated by a cord tensioning system incorporated within the pleated insect mesh. The cord tensioner, assists in the tensioning of the screen and resists blow out in windy conditions. The unique retracting mesh guide disappears when the screen is opened giving the floor a safer, cleaner and flush finish. The screen is smooth to operate and allows users to gently slide the screen to any position.

The attractive semi transparent mesh is designed to give maximum view with maximum ventilation

When opened, the mesh guide along with the insect mesh neatly stacks to the side of the opening.

The wire tension system assists in the motion of the screen making it smooth and easy to operate. The pleated mesh resists sagging in windy conditions and easily returns to shape.

Pleated Flat Track is less prone to screen blowout. The reinforced pleated mesh, combined with special mesh retention clips and sill-tracking guide keeps the mesh in position. The Mesh is retained at the sill with a retractable track guide that disappears when operated, leaving a virtually unimpeded pathway through the opening.
