Freedom Screens is an Australian company dedicated to being at the forefront of commercial and residential insect and screen technology.

We have a long and trusted reputation, and pride ourselves on quality and customer satisfaction.

Established in 1999 on the beautiful Gold Coast, Queensland, Australia. Freedom Screens has now grown to be an Australian industry leader with 13 stores nationwide – Freedom Screening is the SA distributor.

It is our dedication to innovation and quality that has allowed us to grow and be accepted as a measure of quality in insect screen development on the national and international market.

“I can't believe how Freedom Magnetic Flyscreens not only solved our insect problems forever, they look stylish and were installed with the minimum of fuss. I would recommend Freedom Magnetic Flyscreens.” Andy G

**KEEP THE BUGS OUT AND
LET THE VIEW IN**

- Magnetic insect screens are flexible and almost invisible.
- They blend perfectly for casement windows and hopper (push out type windows) requiring internal screens while still providing easy access to operate and clean your windows.
- Our Magnetic Flyscreens are the affordable must have flyscreens for Australian conditions.
- Magnetic insect screens are a fantastic screening alternative to the unsightly aluminium fixed screens or for those windows that you were told cannot be screened.

- Many homes have hopper windows more commonly known as pushout windows, casement windows or you may just want to have a screen that can't really be seen.
- If you have Casement or Hopper windows you most likely don't have screens or you may have unsightly hinged framed fly screens with a little trap door so as to put your hand through to open the window.
- Well now you can throw them away and install Magnetic fly screens for a fraction of the price yourself.
- These screens are fitted either over the edge of your window architrave or window frame or fitted in a reveal configuration (inside your window frame)

- A reveal fit Magnetic insect screen requires a trim inside the window of at least 15mm to carry the magnetic strip for the screen to mount on, the magnetic strip can be attached to Timber, Aluminium, or PVC.
- When you need to open or close your window just lift using the corner finger grip of the magnetic screen adjust your window and just let the screen drop back into place.
- When these screens become dirty just lift off and pull out from the top hinge and hose down outside or if not needed in the winter months just put them away.
